

Kirti Purohit

Software Engineer. Backend and distributed systems. Bengaluru, India

github.com/Irene-123 | linkedin.com/in/kirtidineshpurohit | kirtipurohit050@gmail.com | kirtipurohit.in

Last updated: August 2026

Experience

Software Engineer, Quantum Corporation Dec 2024 to present, Bengaluru

StorNext, AI and storage engineering. Distributed concurrency and an internal Git indexing RAG.

Software Engineer, Hewlett Packard Enterprise Jul 2023 to Dec 2024, Bengaluru

SaaS customer platforms. Kafka, DynamoDB, Kubernetes and AWS infrastructure.

Software Engineering Intern, Hewlett Packard Enterprise Jan 2023 to Jul 2023, Bengaluru

Backend services on the customer platform stack.

Software Engineering Intern, Dinosys Infotech May 2022 to Dec 2022, Mumbai

Forensics tooling deployed to cyber crime investigation units across 16+ Indian state government agencies.

Projects

SagaForge AI, Distributed Transaction Orchestrator (2026)

Event-driven saga orchestrator across eight Go services over Kafka. Transactional outbox with polling publisher, idempotent handlers, central compensation. Go, Kafka, Postgres, Azure OpenAI.

X clone Backend (2026)

Fan-out-on-write social feed. Redis and sharded Postgres, sub-150ms P95 feed latency, Kafka and WebSockets, Kubernetes with autoscaling and Prometheus.

Medical Insurance Rights Engine (2026)

Policy documents to plain language. Sparse retrieval and guardrails on computed figures, clause-level evidence, six-stage multilingual OCR pipeline.

Storage Telemetry RAG (2025)

Natural language questions over capacity, IOPS, latency and error rate series. Retrieval over downsampled windows, RAGAS-style evaluation harness, Grafana panels.

GPU Resource Management and Virtualization in Kubernetes (B.Tech thesis, 2023)

Kubernetes device plugin allocating GPU memory and compute independently, with an extended scheduler filter, validated on HPC workloads.

Open source

Talk-to-PC MCP Server (2025). Published to PyPI and listed in Anthropic's MCP directory. Linux diagnostics through an LLM with guardrails and explicit confirmation for sudo operations.

ChatGPT Desktop (lencx/ChatGPT). DALL-E 2 integration in Rust, WebView routing via Tauri commands.

RustDesk (GitHub Octernship, 2023). Fixed a SOCKS5 proxy bug, around 15% connection throughput improvement upstream. Flutter UI pages for shell output.

Technical

Languages: Go, Python, Bash, C++11, Java, Rust

Distributed systems: Kafka, event-driven architecture, saga and outbox patterns, idempotency, concurrency

AI: LangGraph, agentic workflows, MCP, RAG, RAGAS evaluation, guardrails, fine-tuning

Infrastructure: Kubernetes, Docker, AWS, Prometheus, Grafana, RHEL

Data: PostgreSQL, DynamoDB, Redis, Neo4j

Selected

CKAD, Linux Foundation, 2024. Codechef rating 1887, global ranks 678 and 245. WorldQuant, 55th, bronze, 2023. GATE All India Rank 3343.
